Summary

Senior Software Engineer, **8+ years** building full-stack, distributed SaaS platforms and production AI search. Own the architecture, performance, and scalability of a core revenue product on AWS serving **100+ enterprise customers** across **10k+ licensed seats**. Manage **7+ engineers**.

Key Achievements

- Cut P95 API latency **from 600ms to 320ms** and raised throughput **40%+** (around 5k requests/min at peak).
- Led the platform's shift from keyword search to a production **RAG + LLM** suite, improving retrieval accuracy **15%**.
- Delivered the flagship product to marquee accounts across Gulf retail, Indian fintech, MENA banking, healthcare.
- Reduced infrastructure cost **30%** through VP9 transcoding and CI/CD optimization.

Professional Experience

Kochar Infotech Ltd. Aug 2019 – Present
Senior Software Engineer (SDE-3) – promoted from SDE-1 via SDE-2 *Gurgaon, India*

Knowmax (Knowledge Management Platform) knowmax.ai | *2023 – Present*

- Own full-stack architecture of this multi-tenant, microservices knowledge platform (React, NestJS, Redis, PostgreSQL).
- Built the production RAG search (Typesense, LangChain, Azure OpenAI) with Arabic and multilingual semantic search.
- Developed LLM authoring (article, FAQ, decision-tree, quiz) and an AI agent training simulator on Gemini and GPT.
- Engineered an MCP server exposing knowledge APIs to AI agents, with PII masking for banking compliance.
- Built enterprise integrations (Genesys, Zendesk, MS Dynamics, Cisco) for contact-center and CRM workflows.
- Led a zero-downtime monolith-to-microservices migration across live tenants, with per-tenant data isolation and RBAC.
- Manage **7+** engineers and interns: design and code reviews, planning, delivery, and feature scoping with product.

Phygital (Social vCommerce Platform) phygitalmax.com | *2021 – 2023*

- Developed full-stack features for this commercial social vCommerce product (Next.js, Node.js): shoppable video, live streams, and creator-led discovery tied to real-time purchase flows.
- Engineered a video streaming backend with real-time analytics, tuned for low latency under high concurrency.

LEAP (Cross-Platform Desktop App) leapmax.ai | *Aug 2019 – 2021*

- Built the React frontend and designed a multi-tier AWS backend (EC2, S3) for a cross-platform desktop product delivered to an enterprise client, with full CI/CD, observability, and a **99.9% uptime SLA**.

Nugen I.T. Services Apr 2018 – Aug 2019
MERN Stack Developer *Jalandhar, India*

- Built full-stack web applications on the MERN stack, mostly React front-ends and Node.js services.

Technical Skills

Languages: TypeScript, JavaScript, SQL · **Data & Caching:** PostgreSQL, Prisma, Redis, BullMQ

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Framer Motion, PWA

Backend & Architecture: Node.js, NestJS, Microservices, REST/WebSocket APIs, Distributed Systems

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD, Nginx, Git, Linux, Observability & Monitoring

Integrations & Auth: Genesys, Zendesk, MS Dynamics, Cisco, Keycloak (SSO/OAuth), Webhooks

AI & Search: RAG Pipelines, LangChain, Azure OpenAI, Gemini, Google Vertex AI, MCP, Multilingual Semantic Search

Education & Recognition

Lovely Professional University | *Master of Computer Applications (MCA)* 2017 – 2019 | *Jalandhar, Punjab*

Guru Nanak Dev University | *Bachelor of Computer Applications (BCA), Grade A* 2014 – 2017 | *Punjab, India*

Awards: **1st Place** – Hackathon 2019, DAVIET · **3rd Place** – Hackathon 2019, IIT Ropar
