Summary

Senior Software Engineer with **7+ years** building full-stack, distributed SaaS platforms and production AI search systems. Currently lead architecture, performance, and scalability for one of the company's main revenue-generating SaaS products, serving **100+ enterprise customers** and **10,000+ end users** on AWS. Experienced with React, NestJS, system design, and RAG pipelines, and currently manage a team of **7+** engineers and interns.

Key Achievements

- Cut P95 API latency **from 600ms to 320ms** and raised throughput **40%+** (around 5k requests/min at peak).
- Led the platform's shift from keyword search to a production **RAG + LLM** suite, improving retrieval accuracy **15%**.
- Delivered the flagship product to marquee enterprise accounts: Majid Al Futtaim, PhonePe, National Bank of Egypt, Alinma Bank, and Premier Health Solutions.
- Reduced infrastructure cost **30%** through VP9 transcoding and CI/CD optimization.

Professional Experience

Kochar Infotech Limited Aug 2019 – Present
SDE-3 (Promoted SDE-1 to SDE-2 to SDE-3) *Gurgaon, India*

Knowmax (Knowledge Management Platform) *knowmax.ai*

- Own full-stack architecture of this multi-tenant, microservices knowledge platform (React, NestJS, Redis, PostgreSQL), one of the company's main revenue-generating SaaS products, serving **100+ enterprise customers** and **10,000+ licensed end users**.
- Built and own the production RAG search system (Typesense, LangChain, Azure OpenAI) with multilingual semantic search (including Arabic) for global enterprise clients.
- Built LLM-powered authoring features (article, FAQ, decision-tree, quiz, and picture-guide generation) and an AI agent training-simulation module on Gemini and GPT, expanding the platform's AI capabilities.
- Built an MCP server exposing knowledge APIs to AI assistants/agents, and added PII masking on AI summaries to meet enterprise and banking compliance requirements.
- Built and maintained enterprise integrations (Genesys, Zendesk, Microsoft Dynamics, Cisco) that embed Knowmax into contact-center and CRM agent workflows.
- Led a zero-downtime monolith-to-microservices migration across live tenants, and designed a secure multi-tenant architecture with strict per-tenant data isolation and role-based access control (RBAC).
- Manage a team of **7+** engineers and interns as their reporting manager, owning design and code reviews, task planning, and delivery, and partnering with product to scope new features.

Phygital (Social vCommerce Platform) *maxicus.com/shopping-with-live-video*

- Built full-stack features for Phygital, a commercial social vCommerce product (Next.js, Node.js): shoppable video, live streams, and creator-led product discovery tied to real-time purchase flows.
- Built a video streaming backend with real-time analytics, tuned for low latency under high concurrent viewership.

LEAP (Cross-Platform Desktop App) *leapmax.ai*

- Built the React frontend and designed a multi-tier AWS backend (EC2, S3) for a cross-platform desktop product delivered to an enterprise client, with full CI/CD, observability, and a **99.9% uptime SLA**.

Technical Skills

Languages: TypeScript, JavaScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Framer Motion, PWA

Backend & Architecture: Node.js, NestJS, Microservices, REST/WebSocket APIs, Distributed Systems

Data & Caching: PostgreSQL, Prisma, Redis, Typesense, BullMQ

Cloud & DevOps: AWS (EC2, S3), Docker, CI/CD, Nginx, Git, Linux, Observability & Monitoring

Integrations & Auth: Genesys, Zendesk, MS Dynamics, Cisco, Keycloak (SSO/OAuth), Webhooks

AI & Search: RAG Pipelines, LangChain, Azure OpenAI, Gemini, Google Vertex AI, MCP, Multilingual Semantic Search

Education

Lovely Professional University Jalandhar, Punjab
Master of Computer Applications (MCA) *2017 – 2019*

Awards & Recognition

1st Place – Hackathon 2019, DAVIET

3rd Place – Hackathon 2019, IIT Ropar
